	Mounting holes	3
	Pressure port thread	M14x1.5
	Return port thread	M16x1.5
	Lock-to-lock turns	approximately 3.5

PRODUCT DESCRIPTION

This steering gearbox is designed specifically for the Mazda 2000 pickup and is fully compatible with its hydraulic power steering system. It transmits steering wheel rotation to the wheels, amplifies driver input, and ensures precise vehicle control. Common failure signs include stiff steering, excessive play, hydraulic fluid leaks, and abnormal noises. Always verify steering type and vehicle model before installation. Authenticity and quality are guaranteed by Autochana.
